QUALIFICATIONS SUMMARY

As a Full-Stack Developer at Youtan, I have gained experience in creating and maintaining web applications, including developing robust systems, crafting APIs, and executing effective database queries using SQL. Proficient in developing interactive and responsive user interfaces with TypeScript and ReactJS, emphasizing component reusability and data integration. Completed additional training in React, Python/Django, and SQL, with intermediate proficiency in English. Committed to expanding knowledge and experience, continuously seeking opportunities for growth and development in the field.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer - Internship - [Youtan](#)

01/09/2023 - Present

- Responsible for creating and maintaining web applications using the Django framework to develop robust systems and manage business logic, as well as utilizing Django Rest Framework for API creation and maintenance.*
- Conducted database queries on Microsoft SQL Server and PostgreSQL to ensure efficient data manipulation and retrieval.*
- Utilized TypeScript and React for developing interactive and responsive user interfaces, focusing on reusable component creation and backend data integration.*
