---

## SUMMARY OF QUALIFICATIONS

Software Developer with consolidated experience during my internship as a Fullstack, where I gained skills in technologies such as ReactJS, Django, Docker, and MSSQL. I stand out for my constant evolution and significant contributions to complex projects, including the successful implementation of systems using React and Django. With a theoretical knowledge base acquired through courses, personal and academic projects, complemented by familiarity with Linux systems and intermediate English skills, I am committed to continuous learning and advancing in my software development career.

## ACADEMIC EDUCATION

Bachelor of Science in Analysis and Systems Development (IN PROGRESS) - ETEP University Center - CST

- Expected Graduation: Jun/2024

## PROJECTS

*Social Media Dashboard* - [Github](#) | [Web](#)

- An application that displays social media statistics
- Modern and intuitive interface with data visualizations that facilitate understanding of the collected information.
- Developed with ReactJS, TypeScript, Sass
- It consumes a API provided by a fake online server
